Off-Label Drug
Corporate Medical Policy

File name: Off-Label Drug
File code: UM.PHARM.01
Origination: New Policy
Last Review: 08/2016
Next Review: 08/2017
Effective Date: 04/01/2017

Description/Summary

This Policy provides assistance in interpreting Blue Cross Blue Shield of Vermont’s Prescription Benefit plan for deciding drug coverage.

Definitions

Chronic Care: health services provided by a health care Professional for an established clinical condition that is expected to last a year or more and that requires ongoing clinical management attempting to restore the individual to highest function, minimize the negative effects of the condition and prevent complications related to chronic conditions. Examples of chronic conditions include anxiety disorder, asthma, bipolar disorder, COPD, diabetes, heart disease, major depression, post-traumatic stress disorder, schizophrenia or substance abuse.

Compendia: a comprehensive listing of FDA approved drugs and biologicals (CMS.org)

Prescription Drug and Biologics: are prescribed by a provider for a medical condition; FDA-approved; and approved by us for reimbursement for the specific medical condition being treated or diagnosed, or as otherwise required by law

Medically necessary care: Health care services including diagnostic testing, preventive services and after-care appropriate, in terms of type, amount, frequency, level, setting and duration to the member’s diagnosis or condition. Medically Necessary Care must be informed by generally accepted medical or scientific evidence and consistent with generally accepted practice parameters as recognized by health care Providers in the same or similar general specialty as typically treat or manage the diagnosis or condition, and:

Help restore or maintain the member’s health OR prevent deterioration of or palliate the member’s condition OR prevent the reasonably likely onset of a health problem or detect a developing problem (Vermont Rule 9-03)
Off Label Use of a Drug: use of a drug for other than the particular condition for which the Federal Drug Administration gave approval.

Orphan Drug Status: The Orphan Drug Act provides granting specific status to a drug or biological product to treat a specific rare disease or condition (fda.gov).

Serious Condition: A disease or condition associated with morbidity that has substantial impact on day-to-day functioning. Short lived and self-limiting morbidity will usually not be sufficient, but the morbidity need not be irreversible if it is persistent or recurrent. Whether a disease or condition is serious is a matter of clinical judgment based on its impact on such factors as survival, day-to-day functioning or the likelihood that the disease, if left untreated, will progress from a less severe condition to a more serious one. (http://www.fda.gov/downloads/drugs/guidancecomplianceregulatoryinformation/guidances/ucm358301.pdf)

Policy Guidelines
A. If a prescription drug or biologic has been designated orphan drug status, this policy does not apply. The request may be approved on the FDA orphan drug designation status. Designation status may be found in DRUGDEX system by Micromedex or by going to fda.gov and search orphan drug designations and approvals. http://www.accessdata.fda.gov/scripts/opdlisting/opip/index.cfm
B. Off Label prescription drug use for oncologic indications. BCBSVT follows Vermont State Statute. See: http://legislature.vermont.gov/statutes/section/08/107/04100e
C. In the absence of prior authorization clinical criteria which addresses the specific off label use, Off Label prescription drug use for non-oncologic indications may be considered medically necessary when ALL of the following conditions are met:
   1. The drug is approved by the U.S. Food and Drug Administration AND
   2. The requested drug is prescribed by a licensed, registered health care professional authorized by the appropriate jurisdiction to prescribe and administer drugs in the course of professional practice AND
   3. The requested drug is intended to treat a chronic and/or serious condition ( as defined in this policy) AND
   4. Documented history of failure, contraindication, or intolerance to standard, conventional therapies to treat or manage the disease or condition, where available AND
   5. Diagnosis is clinically supported as a use by at least ONE of the following:
      One of the following current compendia:
      i. The American Hospital Formulary Service Drug Information (AHFS-DI) under the Therapeutic Uses section
      ii. Facts & Comparisons eAnswers® under the Indications section with a Level of Evidence Scale of A, B, OR G
iii. DRUGDEX System by Micromedex has a Strength of Recommendation rating of Class I, Class IIa, OR IIb under the Therapeutic Uses section.

D. If the criteria in C above is not met, the drug and its use is considered investigational.

Reference Resources

Document Precedence

Blue Cross and Blue Shield of Vermont (BCBSVT) Medical Policies are developed to provide clinical guidance and are based on research of current medical literature and review of common medical practices in the treatment and diagnosis of disease. The applicable group/individual contract and member certificate language, or employer’s benefit plan if an ASO group, determines benefits that are in effect at the time of service. Since medical practices and knowledge are constantly evolving, BCBSVT reserves the right to review and revise its medical policies periodically. To the extent that there may be any conflict between medical policy and contract/employer benefit plan language, the member’s contract/employer benefit plan language takes precedence.

Audit Information

BCBSVT reserves the right to conduct audits on any provider and/or facility to ensure compliance with the guidelines stated in the medical policy. If an audit identifies instances of non-compliance with this medical policy, BCBSVT reserves the right to recoup all non-compliant payments.

Administrative and Contractual Guidance

Benefit Determination Guidance

Benefits are subject to all terms, limitations and conditions of the subscriber contract.

An approved referral authorization for members of the New England Health Plan (NEHP) is required. A prior approval for Access Blue New England (ABNE) members is required. NEHP/ABNE members may have different benefits for services listed in this
policy. To confirm benefits, please contact the customer service department at the member’s health plan.

Federal Employee Program (FEP): Members may have different benefits that apply. For further information please contact FEP customer service or refer to the FEP Service Benefit Plan Brochure. It is important to verify the member’s benefits prior to providing the service to determine if benefits are available or if there is a specific exclusion in the member’s benefit.

Coverage varies according to the member’s group or individual contract. Not all groups are required to follow the Vermont legislative mandates. Member Contract language takes precedence over medical policy when there is a conflict.

If the member receives benefits through an Administrative Services Only (ASO) group, benefits may vary or not apply. To verify benefit information, please refer to the member’s employer benefit plan documents or contact the customer service department. Language in the employer benefit plan documents takes precedence over medical policy when there is a conflict.

Health Care Procedure Coding System (HCPCS) codes related to chemotherapy drugs, drugs administered other than oral method, and enteral/parenteral formulas may be subject to National Drug Code (NDC) processing and pricing. The use of NDC on medical claims helps facilitate more accurate payment and better management of drug costs based on what was dispensed and may be required for payment. For more information on BCBSVT requirements for billing of NDC please refer to the provider portal [http://www.bcbsvt.com/provider-home](http://www.bcbsvt.com/provider-home) latest news and communications.

Eligible providers

Qualified healthcare professionals practicing within the scope of their license(s).
